

Integration

Introduction

The iVvy - Xero integration enables clients to synchronise their iVvy invoices with Xero, daily. Once configured, an "iVvy Contacts" group will automatically be created within the Xero system. Each contact that has been assigned an invoice in iVvy, will then be added to that group within Xero.

How it works

Mirror image
line items from
iVvy to Xero

Key features

- Users are able to sync, on a daily basis, all paid invoices from iVvy into Xero, as well as cross reference invoices in iVvy with invoices in Xero. The integration also supports partial payments.
- Automatically creates an iVvy contact group in Xero from iVvy contacts.
