Introduction

With the iVvy and ResDiary intergration, you can push all your event's booking information in iVvy Venues Software including bookings and contacts through to your ResDiary Dimmi account.

How it works

Key features

- Block out space in ResDiary/Dimmi for your event, negating any double-bookings.

- No manual data entry from your iVvy Event to ResDiary/Dimmi saving double-handling, time and maximises data accuracy.

- The booking in ResDiary/Dimmi will include a link to your virtual run sheet in iVvy, so the team knows what to do.

Create transparency between your Functions & Front-of-House teams
