## Introduction

This integration, currently exclusively for iVvy UK clients, allows you to sync your customer contacts, sales invoices, payments and sales credit notes from iVvy to Sage.

How it works

iVvy. → **Data direction** → sage

Contacts	- - -▶	Customers
Invoices	- - -▶	Sales invoice
Payments	- - -▶	Customer receipts
Payments	◀- - -	Sage payments

Key features and benefits

- With this integration, Sage will have an accurate view of what receivables are going through the iVvy Venue software.

- This integration also voids invoices when orders are cancelled in iVvy.

- Users can sync their invoices from the iVvy system into the Sage system in a one way synchronisation.

- Users are able to synchronise invoice payments in a two way synchronisation between Sage and iVvy.

- Data is synced automatically on a daily basis or can be manually triggered.

- Sage users are able to select to sync their payments from Sage into iVvy.

Have an accurate view of account receivables through iVvy
