

# Integration

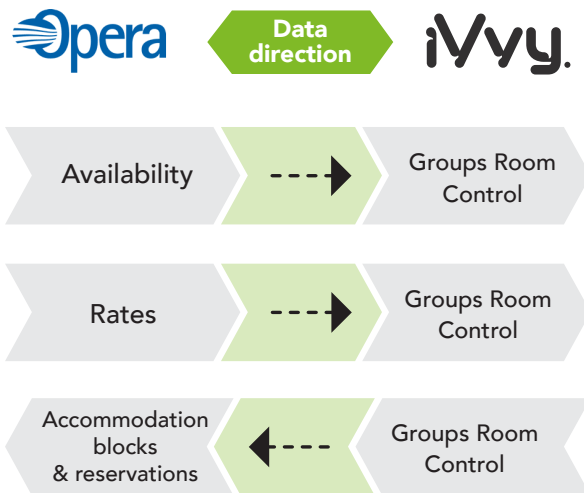

## Introduction

The iVvy and Oracle OPERA Cloud Services integration allows you to view live availability, rates and inventory for accommodation dynamically within iVvy's Group Rooms Control screen.

This integration will help minimise oversold inventory and provide you with instant access to a your venue's accommodation rates and inventory, expediting the quote process.

## How it works

## Key features & benefits

- Display your available accommodation inventory by day, for each room type in iVvy on the Group Rooms Control screen.
- Accommodation blocks and reservations booked in iVvy is updated in OPERA.
- Display your "starting from" pricing on your booking engine, iVvy's Marketplace and iVvy's Partner Marketplaces.
- Accurate view of available inventory in OPERA based on what is committed in both iVvy and OPERA.
- Manage your group's check-ins through OPERA and it will reflect in iVvy that your clients have checked in.
- Avoid oversold inventory with full visibility of available accommodation from the OPERA system.

# Integration

## FAQs

**Q. Can I stop live bookings for accommodation on the Marketplace?**

A. Yes. All bookings that include accommodation will still only go to RFP.

**Q. How do I get started?**

A. Contact your Oracle Account Manager and quote Product ID 'OPX\_IVVY' to get a quote from Oracle for the setup of the OXI interface.

**Q. What version of Opera is the integration valid for?**

A. iVvy is certified for Opera 5.5 but may still work with older versions.

**Q. Does this integration handle postings?**

A. Unfortunately the Opera interface doesn't allow for iVvy to post charges to Opera.
